

# Sampling Systems

Mechatest has become a well known name on the sampling system market designed for use in industrial environments. The Mechatest Sampling Systems are widely used and accepted among the leaders in all kind of industries. We served industrial sectors like: refining, natural gas, gas-processing, petrochemical, chemical, coal-gasification, plastic, food, paper, power stations, water treatment and firms of consulting engineers.

**Supported by our experience, the skills of the engineers and technicians we offer high quality systems which gives you an unequalled value for your money.**

Based on our extensive knowledge, experience and application know-how, we can offer:

- Guaranties on high availability, sample integrity and repeatability of the systems
- Best possible design of your sample handling system
- Low maintenance costs
- Low costs of ownership

All the systems are designed and manufactured at Mechatest B.V. at the workshop in The Netherlands.

## Typical Assembly

- Sampling System for Liquid and/or Gasses
- Mounting facilities with standpipes
- Canopy with lighting
- Shelf for easy sampling handling
